EXPERIENCE

EPAM Systems

Software Engineer

Mar. 2024 – Present

Hyderabad, India

Allied Irish Banks — Mobile Banking (FinTech)

- Contributed to a **production mobile banking app** supporting peer-to-peer payment workflows (Request Money, Split a Bill, Money Transfer).
- Resolved UI defects across payment journeys — text formatting, search, button labels, layout spacing — **reducing QA regression backlog**.
- Increased automated test coverage** using Jest and React Native Testing Library; refactored snapshot tests across multiple releases.
- Improved component maintainability through targeted refactoring, **reducing technical debt** in shared UI modules.

Avis Budget Group — Web Platform (Automotive)

- Built **enterprise web interfaces** integrated with Adobe Experience Manager; developed reusable components and modal workflows from Figma to production.
- Led end-to-end accessibility remediation** — invalid ARIA attributes, accessible names, landmark regions, dialog accessibility, and focus-visible behaviour.
- Achieved **WCAG compliance** across the platform through systematic audit and targeted fixes in collaboration with design and QA.
- Fixed a **critical form-validation bug** allowing mandatory-field bypass; resolved SonarQube code smells to improve maintainability.

PROJECTS

PropertyCue | Python, Machine Learning, React

- Led development of a housing-price prediction platform combining ML regression models with a React web interface; managed end-to-end delivery including data preprocessing and model evaluation.
- Co-authored and published: **“Using Machine Learning to Predict Housing Prices”** — IEEE (2023).

Expense Management System | React, Spring Boot, PostgreSQL, JWT, Docker

- Building a full-stack expense tracker to develop backend engineering capabilities alongside existing frontend expertise.
- Implementing **JWT-based authentication**, RESTful API design with Swagger documentation, and containerised deployment via Docker Compose.

EDUCATION

KIET Group of Institutions

Bachelor of Technology in Computer Science

Aug. 2019 – June 2023

Delhi NCR, India

- Coursework:** Data Structures, Algorithms, Databases, Computer Systems, Machine Learning
- Publication:** “Using Machine Learning to Predict Housing Prices” — IEEE, 2023

SKILLS

Frontend : React, React Native, TypeScript, JavaScript, Redux Toolkit, HTML5, CSS3, Material UI

Accessibility : WCAG, ARIA, Landmark Regions, Focus Management, Dialog Accessibility, Keyboard Navigation

Testing : Jest, React Native Testing Library, Snapshot Testing, Unit Testing

Tools : Adobe Experience Manager (AEM), SonarQube, Jenkins, Jira, Git, GitHub, Bitbucket, VS Code

Backend : Core Java, Node.js, REST APIs, SQL, Spring Boot (learning), Docker (learning)
